OSLO

Tag 1 - Oslo

Enjoy time in Oslo before flying to Svalbard Your expedition begins in Oslo, Norway's fjord-side capital, a city rich in history with a thriving art scene. Wander the Ekebergparken sculpture park, admire the striking Opera House and Munch Museum, relax in a floating sauna on the harbour, or head to Sørenga for urban beach life and New Nordic cuisine, before settling in for the night in an airport hotel.

LONGYEARBYEN

Tag 2 -
Longyearbyen

The town at the top of the world After an early breakfast, you'll fly to Longyearbyen. A short panoramic bus tour offers a first glimpse of the town and its surroundings before lunch. Afterwards, enjoy some free time in Longyearbyen before being transferred to the ship for boarding. This former coal-mining settlement is small and easy to explore on foot. Wander along the main street, lined with boutique shops, an art gallery, and inviting restaurants. You might even spot a Svalbard reindeer wandering by. If you'd like to experience even more of Longyearbyen's unique surroundings, consider joining our voyage with an extended stay in Longyearbyen.

Tag 3 - Peaceful Ny-Ålesund	PEACEFUL NY-ÅLESUND Experience science, serenity, and epic scenery Today you'll discover the serenity of Ny-Ålesund and neighbouring fjords such as Krossfjord and Kongsfjord. Disconnect and enjoy a day without distractions as the Norwegian Mapping Authority's nearby geodetic station means we must switch off Wi-Fi and Bluetooth. One of the northernmost settlements and a former mining town, Ny-Ålesund was the starting point for Roald Amundsen's expeditions north with the airship 'Norge'. Now a hub for global science and climate research, you can still see remnants of the town's history. You'll be immersed in rugged, glacial scenery as we explore the fjords around Ny-Ålesund. Be ready for adventure; we'll seize any opportunity to launch our small expedition boats, go ashore to hike or cruise by majestic glaciers.
Tag 4 - Northwest Spitsbergen National Park	NORTHWEST SPITSBERGEN NATIONAL PARK Experience pristine Arctic wilderness Over the next two days, we'll explore the natural beauty and rugged tundra of this breathtaking national park where steep mountains, glaciers and beautiful offshore islands form a unique Arctic landscape. We'll scout for some of the animals of the Arctic – seals, walruses and reindeer. Early in the season, there's a good chance we may spot polar bears too, so we'll always be on the lookout for these iconic but elusive predators. Be ready for adventure; we'll seize any opportunity to launch our kayaks or use our small expedition boats and go ashore to hike or participate in a beach clean up.
Tag 6 - Ice edge attempt	ICE EDGE ATTEMPT Experience the opportunity of sailing to the edge of the polar ice cap If conditions allow, we'll sail north and cross the 80th parallel to explore the ever-changing ice edge. The transition zone between the ice cap and the sea is a magical yet ephemeral place where the waters are filled with ice floes and drifting pack ice. From the ship, there are great opportunities for spotting wildlife, such as seals and walruses who lounge on the sparkling ice. And if the conditions are right, we'll lower our expedition boats into the water and enjoy an unforgettable close-up experience amid the floating ice. The ice edge isn't a fixed boundary, and it moves depending on the season and conditions, so visiting it will be an attempt rather than a certainty. From May to August, as summer progresses, it retreats further towards the pole, meaning it may be out of reach for us. If so, we'll explore the no-less-impressive fjords, glaciers and incredible scenery of the Svalbard coast. Wildflowers start blooming in July and into August, blanketing the landscape with a blaze of beauty and colour.
Tag 8 - Exploring the east	EXPLORING THE EAST Scouting for polar bears, seabirds and walruses Over these three days, we attempt to venture far into eastern Svalbard. Be ready for anything. This might include Sjuøyane (Seven Islands), Svalbard's northernmost point, where moss-covered granite peaks are home to thousands of breeding seabirds and walrus haul out on rocky shores. Or Zodiac landings in the ice-capped wilderness of Nordaustlandet, where reindeer and Arctic foxes roam the barren tundra. Or Kvitøya, one of the archipelago's most remote islands: a polar bear stronghold with a haunting history of early polar exploration. These are places few ever see, let alone set foot on.
Tag 12 - Hornsund and Bellsund	HORNSUND AND BELLSUND Majestic glaciers, birds and pioneer history Your expedition cruise continues south towards Hornsund – one of Svalbard's most beautiful fjords. Colourful vegetation makes way for towering mountains along this picturesque waterway. The cliffs here are home to large colonies of auks, guillemots and Northern Fulmars along with Arctic foxes and Svalbard reindeer below. Head out on deck to spot seals and whales, Mount Hornsundtind, and glaciers reaching into the sea, and learn about Wanny Woldstad, the first female trapper to hunt in Svalbard. Then we head to admire the classic beauty of the snowcapped mountains of Bellsund - a historic area where you can see the evidence of former whaling and mining activity on the shoreline. Our activities today will be determined by the ever-changing weather conditions of Hornsund and Bellsund. Your Expedition Team will decide on the best possibilities for exploring on the day.
Tag 14 - Longyearbyen	LONGYEARBYEN A last day at the top of the world Your Arctic adventure ends in Longyearbyen, where you'll catch your flight back to Oslo. You'll return home knowing more about Arctic animals, history, polar ice, and climate change than you arrived with, and memories of an incredible experience.
