Day 1

Buenos Aires, Argentina

ARRIVE IN BUENOS AIRES, ARGENTINA

Upon arriving in this splendid city, known for its vibrant Argentinian culture, European architecture and cosmopolitan vibe, you will independently transfer to the designated group hotel, which is included in your Charter Flight & Hotel package.

Day 2

Cruising

FLY TO PUERTO MADRYN AND EMBARK

Following breakfast at our hotel, we will transfer to the airport for our charter flight to Puerto Madryn, in the Patagonian province of Chubut on Argentina's stunning Atlantic coast. Upon arrival in Puerto Madryn, your checked bags will be transferred directly to your ship cabin, leaving you free to explore this lively Patagonian port town. As you stroll the shoreline, you may spot sea lions basking on the beach or catch sight of southern right whales offshore. Visit the local cafés and artisan markets for a taste of the region's Welsh Argentine heritage. In the afternoon, we'll gather for the group transfer to the port to board the ship. After check-in, you'll be shown to your comfortable cabin— your home for the next 18 nights. Once you've settled in, your warm and friendly Expedition Team will introduce themselves and the ship, sharing important details about the voyage ahead. Expect an air of excitement as we set off toward the wildlife-rich sub-Antarctic islands of the Falkland Islands and South Georgia.

Days 3 and 4

Cruising

AT SEA: GETTING TO KNOW YOUR SHIP AND FELLOW TRAVELERS

From Puerto Madryn we set our course for Islas Malvinas, also known as the Falkland Islands, where we aim to dedicate at least three days to exploration. En route, we will transit rich waters that support an array of wildlife, and in these latitudes—between 42 and 51 degrees north—you may spot avian and marine species you might not see further south. Be sure to spend time on the outer decks taking in the open water, and keep your binoculars handy for any wildlife sightings. Your Expedition Team will host expert presentations about the Patagonian coastlines and the isolated wildlife hotspots of the Falklands and South Georgia. Time at sea also provides opportunities to slow down and relax, and spend time getting to know your fellow ship mates who have traveled from diverse countries around the globe—and who share your passion for wildlife and adventure. It's not uncommon for guests to make lifelong friends. As we near the Falkland Islands (also known as Islas Malvinas) sometime in the evening of our second day at sea, you may notice an increase in seabirds, particularly albatrosses. We'll set course for the farthest—and rarely visited—northwest islands in the archipelago. Some of these islands are annual nesting sites for tens of thousands of birds, including the black-browed albatross. While many eyes may be trained toward the horizon and above in search of birds, stay alert to signs of movement above and beneath the surface of the water. Peale's, Commerson's, and dusky dolphins can be seen here, along with the occasional baleen and long-finned pilot whale.

Days 5 to 7

Cruising

THE FALKLAND ISLANDS (ISLAS MALVINAS)

With extended time in the Falklands, we'll seek opportunities to visit seldom explored sites renowned for birdlife and beauty. Our destinations will depend entirely on weather and marine forecasts, as the outer Falklands are exposed to oceanic swells. We'll choose locations that offer the best—and safest—conditions for exploration. One such site is the small, slender Steeple Jason, one of the most northwesterly islands in the Falklands. Difficult to access, it has been featured in numerous wildlife documentaries for its prolific black-browed albatross colony—the largest in the world, with an estimated 100,000 to 180,000 breeding pairs. It's truly a sight to behold. Their closely packed nests stretch for hundreds of meters along the shoreline, just beyond dense tussock grasses. Looking west to sea, you'll likely see albatross riding the wind. The walk to the colony crosses uneven terrain and impressive tussock grass, which provides critical habitat for many other bird species. These vivid green grasses, rooted in rocky soil, create a striking contrast with the sharp ridgeline in the background. Largely untouched by humans, Steeple Jason is home to a small shepherd's outpost and a research field station—overshadowed by vast wilderness. Steeple Jason offers a rare chance to feel truly remote amid a vast ecosystem alive with countless animals. Our explorations may also take us to New Island, just over thirty nautical miles south of Steeple Jason. A paradise for birders, this small island boasts coves with white sandy beaches sheltered from the open ocean, and is considered one of the most beautiful in the Falklands. Around 25,000 to 30,000 black-browed albatross nest here, joined by Magellanic, gentoo, and southern rockhopper penguins—each with its own distinct nesting style. Other common sightings include songbirds and the formidable striated caracara. Dolphins, including those in shallow waters, are frequently seen in the area, adding to the island's remarkable wildlife encounters. Other wilderness destinations may include bird-rich West Point and Saunders Islands in the western Falklands. Saunders Island will amaze you with its long white-sand beaches, the northern shore stretching for kilometers and facing the open sea. It's almost surreal— particularly if you've encountered penguins in ice-and snow-laden Antarctica on previous voyages—to watch gentoo, Magellanic, and southern rockhopper penguins making their way to the water along sandy stretches. There's also a smaller colony of black-browed albatross nests on a nearby cliff, sharing the gently sloped, grassy island with grazing sheep tended by the warm-hearted Saunders family. Look for Commerson's dolphins, often spotted in the shallow waters near Saunders' sandy beaches. West Point Island is another Falkland gem, with vibrant green vegetation and blooming spring flowers. From the rocky beach, a gentle walk (with slight elevation) leads through a picturesque meadow to a cliff where black-browed albatross nest. West Point Island is home to 2,000 breeding pairs. We'll visit a small section of the colony for intimate views of albatross in their nests and soaring above the waters. The walk passes through grassy fields dotted with wildflowers, blending the domestic with the wild. Energetic hikers may tackle Mt. Ararat for sweeping views, while others can travel by 4X4 to the colony and overlooks. Peale's dolphins, Falkland steamer ducks, and striated caracara are often seen here. Carcass is also an exciting destination. Like Saunders and New islands, Carcass boasts stunning white-sand beaches meeting the cold, blue waters of the South Atlantic. Magellanic and gentoo penguins nest here, and the tussock grasses are especially impressive. Look overhead for peregrine falcons soaring high above. No visit to the Falklands is complete without a stop in its largest community—Stanley. Highlights include the museum (admission covered) and the striking arch monument built from the jaws of blue whales. Pop into a local restaurant or traditional British pub for Falkland fish and chips, or a pint while chatting with locals about life on this windswept sub-Antarctic island. Stanley has a distinct boundary—where residential streets end and open wilderness and sheep meadows begin to stretch into the horizon. We'll set sail in early afternoon, allowing plenty of time to cover the 700+ nautical miles to our next destination: South Georgia.

Days 8 and 9

Cruising

AT SEA: TRAVERSING THE ANTARCTIC CONVERGENCE

While at sea, we may become aware of our transit over the Antarctic Convergence, or Polar Front. This biological boundary marks where the South Atlantic meets the Southern Ocean, and we'll notice the change as we cross it. Below the Convergence, the water is much colder; where it meets the warmer Atlantic, cloudy or foggy conditions often form. This mixing of currents creates an ideal foraging ground for a variety of birds and marine mammals. We'll likely be accompanied by albatross, petrels, and shearwaters, and may spot whales—some species more often than others. Far from shore, we might see Antarctic fur seals. Seeing prions (part of the petrel family) and shags in greater numbers indicates we're approaching South Georgia.

Days 10 to 15

Cruising

SOUTH GEORGIA: GALAPAGOS OF THE SOUTH SEAS

With extended time in the Falklands, we'll seek opportunities to visit seldom explored sites renowned for birdlife and beauty. Destinations will depend on weather and marine forecasts, as the outer Falklands are exposed to oceanic swells. We'll choose locations offering the best—and safest—conditions for exploration. One such site is Steeple Jason, a small, slender island among the northwesterly reaches of the Falklands. Difficult to access, it has been featured in numerous wildlife documentaries for its prolific black-browed albatross colony—the largest in the world, with an estimated 100,000 to 180,000 breeding pairs. Their closely packed nests stretch for hundreds of meters along the shoreline, just beyond dense tussock grasses. Looking west to sea, you'll likely spot albatross riding the wind. The walk to the colony crosses uneven terrain and impressive tussock grass, which provides critical habitat for many bird species. These vivid green grasses, rooted in rocky soil, contrast sharply with the rugged ridgeline beyond. Largely untouched by humans, Steeple Jason is home to a small shepherd's outpost and a research field station, dwarfed by vast wilderness—an ideal place to feel truly remote. Our explorations may also take us to New Island, just over thirty nautical miles south of Steeple Jason. A paradise for birders, it features sheltered coves with white sandy beaches and is considered one of the most beautiful in the Falklands. Around 25,000 to 30,000 black-browed albatross nest here, alongside Magellanic, gentoo, and southern rockhopper penguins. Songbirds and striated caracara are common, and dolphins— including those in shallow waters—are frequently seen. Other wilderness destinations may include West Point Island and Saunders Island in the western Falklands. Saunders Island impresses with long white-sand beaches, its northern shore stretching for kilometers along the open sea. It's almost surreal to watch gentoo, Magellanic, and southern rockhopper penguins making their way to the water across sandy stretches. A smaller colony of black-browed albatross nests on a nearby cliff, while grazing sheep, tended by the Saunders family, roam the grassy slopes. Look for Commerson's dolphins in the shallows. West Point Island is another highlight, with vibrant green vegetation and blooming spring flowers. A gentle walk leads to a cliffside colony of about 2,000 breeding pairs of blackbrowed albatross. Energetic hikers may tackle Mt. Ararat, while others can travel by 4x4. Peale's dolphins, Falkland steamer ducks, and striated caracara are often seen here. Carcass is another excellent destination. Like Saunders Island and New Island, it features white-sand beaches meeting the cold, blue waters of the South Atlantic. Magellanic and gentoo penguins nest here, and peregrine falcons are often seen overhead. No visit to the Falklands is complete without time in Stanley, its largest community. Highlights include the museum and the striking arch monument built from the jaws of blue whales. Visit a local restaurant or traditional British pub for Falkland fish and chips, or enjoy a pint while chatting with locals. We'll set sail in the early afternoon for the 700+ nautical mile journey to South Georgia.

Days 16 to 19

Cruising

AT SEA: STARTING THE JOURNEY HOME

To say that South Georgia is remote would be an understatement, and as such, we'll need to invest the necessary time to travel the more than 1,000 nautical miles on our return to South America. We'll begin our westward journey through the Southern Ocean, crossing back over the Antarctic Convergence and passing near Burwood Bank—a shallow underwater plateau surrounded by deeper waters. All three of these dynamic regions can provide opportunities for bird-watching and marine mammal sightings, and we'll feel the gradual shift from the chillier ecological Antarctic to the somewhat warmer environments of Tierra del Fuego. If the skies are clear and visibility is good, we might catch our first views of the South American mountains on the horizon well before nightfall. As with other regions we've visited, the shelves near the continent can be rich with birdlife and occasionally marine mammals—but the journey isn't over quite yet. After dinner, we will sail west through the famous Beagle Channel on our approach to Ushuaia, Argentina.

Day 20

Buenos Aires, Argentina

DISEMBARK IN USHUAIA AND FLY TO BUENOS AIRES

We will arrive in Ushuaia in the morning and disembark after breakfast. You will be transferred to the airport for the return group charter flight to Buenos Aires, which is part of your Charter Flight & Hotel Package.

Im Preis inbegriffen

- Ein offizieller Quark Expeditions®-Parka, der Sie warm hält
- Begleitung während Ihrer gesamten Reise durch unsere erfahrenen Expeditionsleiter, einschließlich Landgängen und anderer Aktivitäten
- Alle Zodiac-Transfers und Fahrten gemäß dem Tagesprogramm
- Alle Landgänge gemäß dem Tagesprogramm
- Unterbringung an Bord mit täglicher Zimmerreinigung
- Alle Mahlzeiten, Snacks, alkoholfreie Getränke und Säfte an Bord während Ihrer gesamten Reise (Bitte teilen Sie uns etwaige Ernährungswünsche so früh wie möglich mit.)
- Ausgewählte Biere, Weine und Cocktails gratis während der Öffnungszeiten der Bar und zum Abendessen
- Kaffee, Tee und Kakao rund um die Uhr gratis erhältlich
- Formelle und informelle Vorträge unseres Expeditionsteams und von Gastrednern gemäß Programm
- Ein Fototagebuch zur Dokumentation der Expedition
- Ein Paar wasserdichte Expeditionsstiefel als Leihgabe für Landgänge und Zodiac-Ausflüge
- Föhn und Bademäntel in jeder Kabine
- Kostenloser WLAN-Zugang auf einem Gerät, der grundlegendes Surfen im Internet, E-Mail-Nutzung, Beiträge in sozialen Medien und Sprachdienste ermöglicht. (Für datenintensivere Anwendungen sind Premium-Pakete erhältlich.) Hinweis: Der Internetzugang in den Polarregionen hängt von geografischen und klimatischen Gegebenheiten sowie anderen Faktoren ab, die außerhalb unserer Kontrolle liegen
- Alle sonstigen Servicegebühren und Hafengebühren während des gesamten Programms
- Die gesamte Gepäckabfertigung an Bord des Schiffes

Charterflug- und Hotelpaket

Das Paket im Wert von 1.045 USD ist in der Expedition enthalten

- Eine Übernachtung im Hotel in Buenos Aires vor Beginn der Expedition inklusive Frühstück (Hinweis: Die Anzahl der Gäste pro Zimmer entspricht der Kabinenbelegung auf dem Schiff. Aufgrund begrenzter Verfügbarkeit werden Reisende, die an Bord eine Suite buchen, im Hotel in Standardzimmern untergebracht. Dreibettzimmer sind möglicherweise nicht verfügbar.)
- Gruppenflug ab dem Inlandsflughafen von Buenos Aires (Aeroparque/AEP) nach Puerto Madryn und Rückflug von Ushuaia zum internationalen Flughafen von Buenos Aires (Ezeiza/EZE).
- Gruppentransfer vom Hotel zum Flughafen in Buenos Aires
- Gruppentransfer vom Flughafen Puerto Madryn zum Schiff sowie Gruppentransfer vom Schiff zum Flughafen Ushuaia bei Ihrer Rückkehr. (Hinweis: Der Transfer bei Ankunft in Buenos Aires vom Flughafen zum Hotel zu Beginn der Reise ist nicht inbegriffen. Bitte begeben Sie sich selbstständig zum im Preis inbegriffenen Hotel.)

Nicht im Preis inbegriffen

- Internationale Flugkosten
- Transfers bei Ankunft und Abreise
- Kosten für Reisepass und Visum
- Staatliche Ankunfts- und Abreisesteuern, die oben nicht erwähnt sind
- Mahlzeiten an Land, sofern nicht anders angegeben
- Gepäck-, Stornierungs-, Reiseabbruch- und Reisekrankenversicherung – dringend empfohlen
- Gebühren für Übergepäck auf internationalen und Inlandsflügen
- Vorgeschriebene wasserdichte Hosen für Zodiac-Fahrten sowie sonstige nicht erwähnte Ausrüstung

- Wäscheservice, Bar, Spa und sonstige persönliche Ausgaben, sofern nicht anders angegeben
- Telefongebühren können je nach Standort variieren
- Freiwilliges Trinkgeld am Ende der Reise für das Bordpersonal und die Besatzung
- Zusätzliche Übernachtungen
- Abenteueroptionen, die nicht unter „Im Preis enthaltene Aktivitäten“ aufgeführt sind
